10 Million of Our Monitors Go to Work Daily Under an Alias. (Its Time We Introduce Ourselves)

ARGON

Savvy buyers know that not all PCs are built by the company whose name is on the label. Did you know the same is true for monitors?

Argon Technologies is the first company in the United States to exclusively market the monitors made to the performance and quality requirements of the world's largest computer and monitor companies. In fact, remove the plastic shell from a few of the top-selling (and award-winning) monitors and you'll find the very same components inside!

High volume manufacturing provides the combination of reliability and cost efficiency that is only possible when you produce over a half-million monitors per month. All manufacturing is done in factories with ISO9000/9001/14000 certification, so failure rates are barely measurable.

It's the latest technology supported by a great limited warranty: 3 years parts and labor with free 48-hour advance replacement service standard. That kind of premium service costs anywhere from \$49 to over \$200 from other monitor companies.

Model	Size	Specs	Est. MSRP
T354	35" Flat Tube 12.8" Viewable	1024 x 768 26mm Panel	\$159
T270	27" Flat Tube 15.8" Viewable	1280 x 1024 27mm Panel	\$209
T232	23" Flat Tube 20" Viewable	1600 x 1440 25mm Panel	\$499
TP-S LCD	20" Speakers & microphone	1024 x 768 19" Flat Panel	\$249

Of course we know what you would really like is the very best monitor at the most attractive price. Check the model listings and specifications shown here and you will see we have some great monitors at head-burning prices!

Whether you're buying a new PC or upgrading to a new CRT or eye-

popping flat panel display, get the full Argon story at www.argontechnologies.com, or contact one of our readers. We've introduced ourselves. Now we'd love to hear from you!

NOW Supports Windows NT 4.0!

Hijaak PRO 4.0. Powerful Graphics Conversions at Your Fingertips.

Stop Wrestling with Graphics Files
 The all-new Hijaak PRO for Windows 95 and NT 4.0 is the most robust 2D-to-3D graphics tool available. It gives you everything you need to extract, view and manage graphics in over 30 major vector and wireframe formats.

Capture Screen Images - and More
 With Hijaak PRO's powerful utilities, you can grab anything on your screen and turn it into a high-quality graphic. Capture screen images, drawings and more - no matter what file. Powerful viewing capabilities mean you can view any supported file - even PostScript Level 2 print files.

Pump-up Your Graphics Viewing
 With Hijaak PRO's desktop and print preview utilities, as well as large thumbnails directly inside Microsoft® Explorer, to maximize viewing precision before printing or files.

Conversion Flexibility
 Hijaak PRO's powerful standard vector file processors access 11 file and convert almost any graphics file, no matter how exotic such as DXF, DWG, RIB, IES and VRML. With Hijaak PRO 4.0, graphics artists, desktop-publishers, CAD professionals or website designers can use detailed images to an infinite number of uses, including creating or enhancing quality.

Managing Graphics Weighing You Down?
 Hijaak PRO enables you to create personalized catalogs containing detailed information on your graphics files, including file names, links, size and date. Furthermore, you can learn to better organize images by creating custom icon files, individual media and separate catalogs.

To handle complex graphics jobs, check out Hijaak PRO's batch and 3D print capabilities - now built in!

Get your own copy by visiting our website above today. Or call us at 1-800-383-0666 and only for order 91133, or go to a FRI at www.quarterdeck.com.
